

## Participants Questionnaire at SUD 2026

# Transfer and Cooperation Projects for Sustainability Transformation

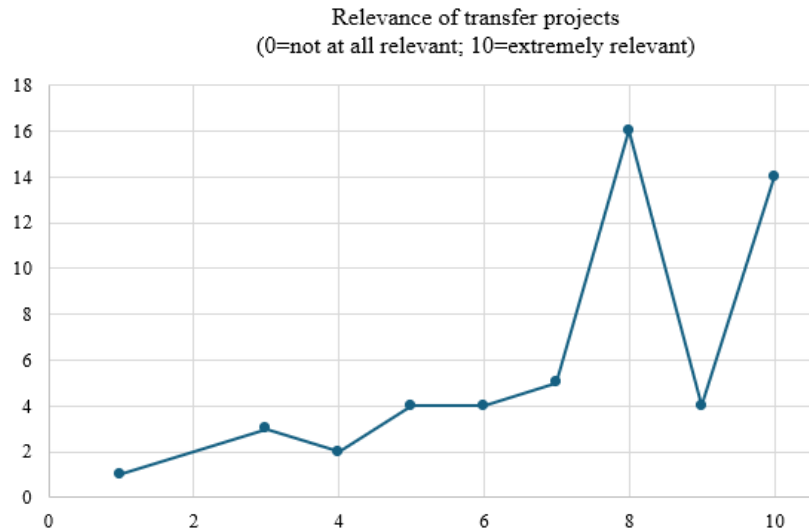

## Overview of selected results

This two-page document presents selected visualised results from our participant questionnaire, which was conducted during the introductory plenary session at SUD on the 1st of September 2026. The purpose of the questionnaire was to assess the relevance of transfer and cooperation projects in participants' everyday work and to measure their interest in contributing to such projects. In addition, we sought to identify the framework conditions and support structures required to initiate impactful transfer and cooperation projects between universities and practice partners.

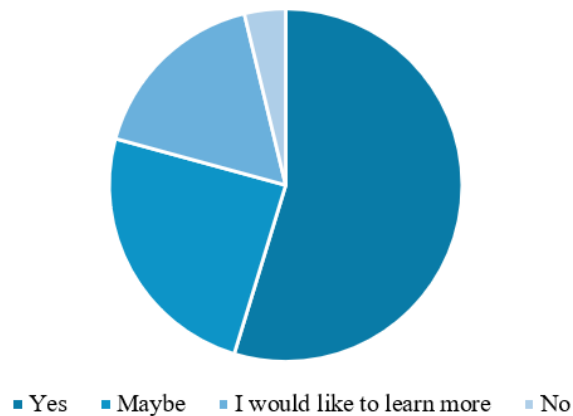

If you have any questions or comments regarding the survey results, please feel free to contact us via the contact form or by email at [simon.zysset@wwf.ch](mailto:simon.zysset@wwf.ch).

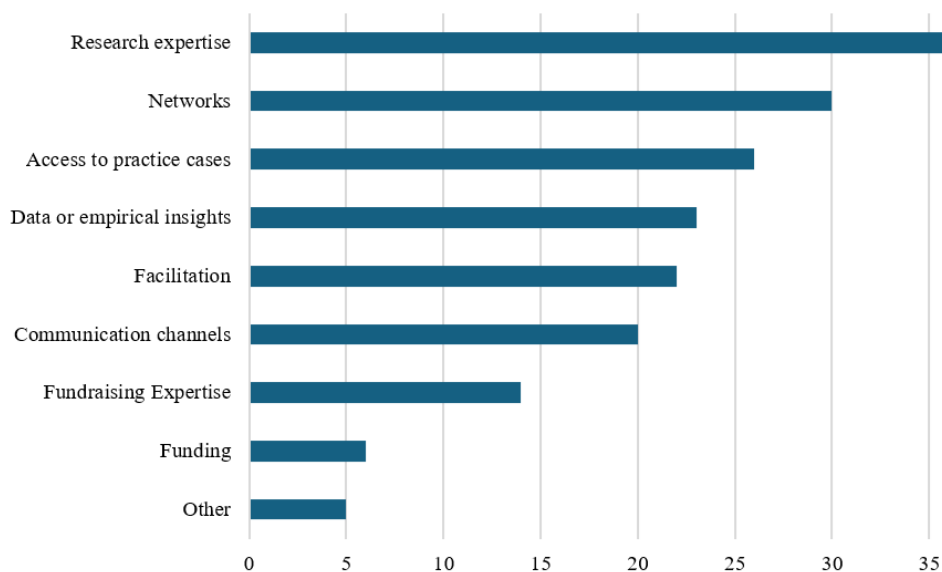

1) How relevant are transfer and cooperation projects in your current work environment? N=53

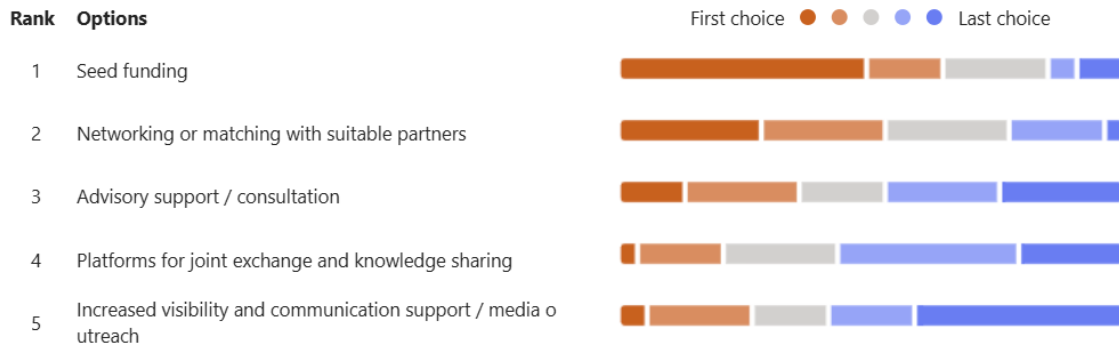

2) Would you be interested in developing a cooperation project involving universities and practice partners? N=53

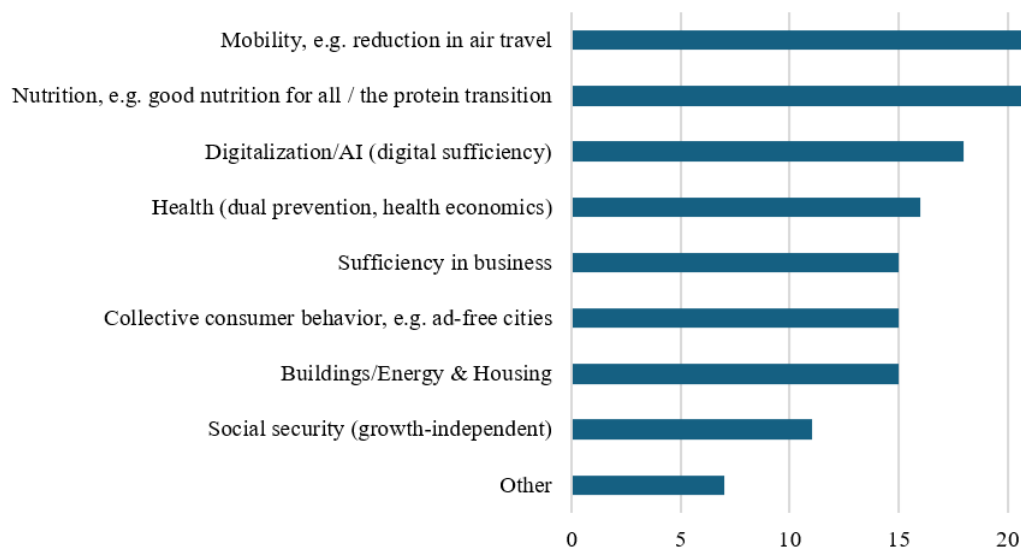

3) What could you or your institution contribute to a cooperation project? Please select all that apply. N=53

- 4) What type of support would help you initiate or develop such a project? Please rank the following options. N=53

- 5) Which of the proposed focus areas for transfer and cooperation projects do you consider most interesting? N=53
